

Afia Navigator

Monitor Wellness in Real Time with PopHealth IQ

Because physical health conditions often go hand in hand with mental health and addiction concerns, behavioral health providers are working hard to support their clients' health needs on a holistic level. **PopHealth IQ**, an offering from our Navigator solution, gives behavioral health organizations the power to monitor and evaluate their clients across all populations served. The result? Lower healthcare costs and even more people who are living healthier, happier lives.

Holistic Insights. Tangible Benefits.

- Improve client health outcomes
- Reduce inpatient hospitalizations
- Reduce Emergency Department visits
- Increase value-based care reimbursements
- Close care gaps and reduce health disparities
- Track client engagement and adherence
